

To Whom It May Concern:

If you are interested in design and installation of sustainable, water efficient landscapes, either residential or commercial, I highly recommend Michael Sandell (aka Wedgley) of Soilogical <https://sustainablesolano.org/meet-designer-michael-wedgley/>

As a director on Bennett Valley Knolls Homeowners' Association and chairperson of the Landscape Committee, I worked with Michael on transforming sections of our development and partnered with Santa Rosa City's Cash for Grass Rebate program.

His work won an award from the City of Santa Rosa Water Efficiency Department.
<https://www.srcity.org/m/newsflash/home/detail/3235>

Michael is a visionary. He works closely with his client to design a landscape that meets all gold standards in the field of soil management, California native plants, and irrigation. He bases his land assessments on science and experience in the field.

He creates digital files and renderings with elegantly detailed proposals.

Not only is Michael a consummate professional in his field, but he is also a good listener and tunes in to personal or community needs. He is open to meetings and discussions with all stakeholders and works to find compromise when needed.

I cannot imagine a more ethical, hard-working and fair contractor.
